

Please do not expand the LPFM service and therefore give them priority over current FM translator services.

A current FM translator station (K-LOVE) is one I do not want to see discontinued. It provides the best influence available on the radio to my family and to many others that are looking for answers in a world of self-indulgence media and bad, self-destructive influences. This station has a great impact on my local community by bringing us together for wholesome and good causes. They benefit the individual through free counseling and the general public by teaching us to love one another and how to come together for those in need. Please do all you can to ensure they remain on the air. There should be many more stations like K-LOVE on the air, not fewer.
